

Dual counterbalance, vented

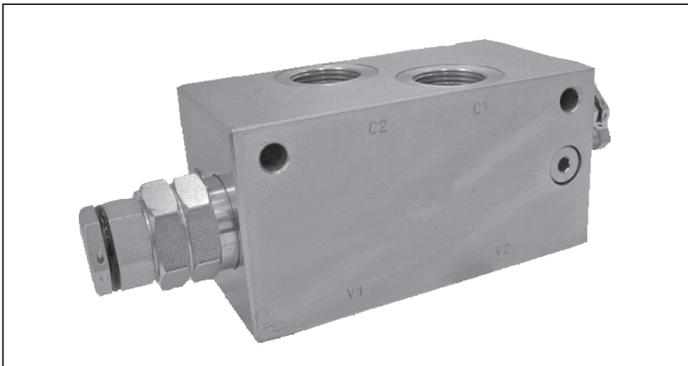

A-VBSO-DE-CCAP-33

08.44.94 - X - Y - Z

RE 18307-70

Edition: 03.2016

Replaces: 08.2010

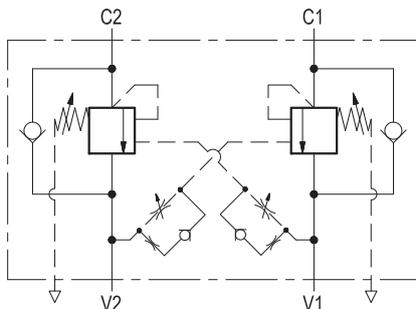

Technical data

Max. operating pressure	410 bar (5945 psi)
Max. flow	150 l/min. (40 gpm)
Weight	4.9 kg (10.8 lbs)
Manifold material	Zinc plated steel
Fluid	Mineral oil (HL, HLP) according DIN 51524
Fluid temperature range	-30 °C to 100 (-22 to 212 °F)
Viscosity range	5 to 800 mm ² /s (cSt)
Recommended degree of fluid contamination	Class 19/17/14 according to ISO 4406
MTTFd	150 years see 18350-51
Other technical data	see data sheet 18350-50
Relief setting:	at least 1.3 times the highest expected load.

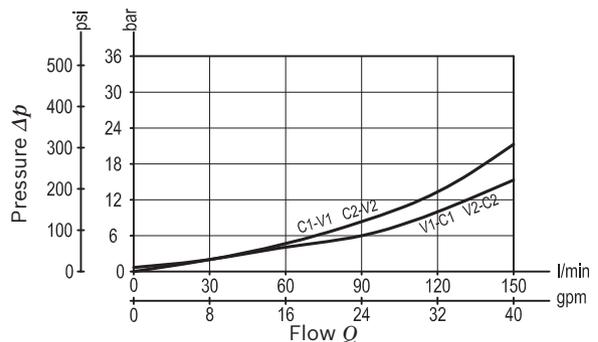

Note: for applications outside these parameters, please consult us.

Description

It provides static and dynamic control of load by regulating the flow IN and OUT of the actuator, through ports C1 and C2. This valve module includes 2 sections, each one composed by a check and a relief valve pilot assisted by pressure in the opposite line: the check section allows free flow into the actuator, then holds the load against reverse movement; with pilot pressure applied at the line across, the pressure setting of the relief is reduced in proportion to the stated ratio until opening and allowing controlled reverse flow. The relief spring chambers are vented to air: relief and piloted opening are independent of back-pressure at V1 or V2.

Characteristic curve

Ordering code
